INTRODUCTION	vii
CHAPTER 1. THE MAIN PHYSICAL-CHEMICAL PROPERTIES	1
1.1. Physical-chemical properties and qualities of biological products	1
1.2. Semi-empirical modeling of physical-chemical properties	3
1.2.1. The Rougier <i>et al.</i> model (2007)	4
1.2.2. The a_w designer	6
1.2.3. The Wilson <i>et al.</i> model (2000)	7
1.3. From thermodynamic state quantities to the physical-chemical properties of food	9
1.3.1. Quick thermodynamics primer	9
1.3.2. Chemical potential, activity and activity coefficient	11
1.3.3. Activities and physical-chemical properties	13
CHAPTER 2. A THERMODYNAMIC APPROACH FOR PREDICTING PHYSICAL-CHEMICAL PROPERTIES	19
2.1. A brief historical overview.	19
2.2. The structure of the thermodynamic model	21
2.2.1. The interactions to be taken into account.	22
2.2.2. The UNIFAC model	23
2.2.3. The electrolyte model	25
2.3. The Achard model.	26
2.3.1. The Achard model structure.	26
2.3.2. Management of chemical species	29
2.3.3. Decomposition into functional groups	29
2.3.4. Advantages and disadvantages of the Achard model.	32

CHAPTER 3. APPLICATIONS TO BIOLOGICAL MEDIA.	35
3.1. Simple media.	35
3.1.1. Sugar solutions	35
3.1.2. Salt solutions	37
3.1.3. Amino acid solutions.	38
3.2. Integration of complex media in the thermodynamic model	41
3.3. Microorganisms culture media	42
3.3.1. Peptones and TMB medium.	43
3.3.2. Gelatin	46
3.3.3. TMBg medium	48
3.4. Meat products	48
3.4.1. Beef and pork	48
3.4.2. Poultry meat	49
3.4.3. Fish	52
3.5. Dairy products	53
3.6. Conclusion on the use of the software for the prediction of physical-chemical properties of biological media.	58
CHAPTER 4. USAGE IN PROCESS SIMULATORS	59
4.1. Introduction to numerical simulation.	59
4.2. Prediction of the growth of microorganisms during a drying process	61
4.2.1. Presentation of the problem.	61
4.2.2. Growth curves.	63
4.2.3. Use of the numerical simulation in order to explain growth curves.	64
CONCLUSION.	67
APPENDICES	69
APPENDIX 1	71
APPENDIX 2	75
APPENDIX 3	77
APPENDIX 4	79
APPENDIX 5	83
