ACKNOWLEDGEMENTS	ix
FOREWORD	xi
INTRODUCTION	xv
ABBREVIATIONS AND ACRONYMS	xxi
CHAPTER 1. INNOVATION LANDSCAPE AND FIELDS	1
1.1. From intensive industrialization to intensive innovation: consequences of global business	1
1.2. Computer sciences, the Internet and mass media	7
1.2.1. Example of applying environmental principles	11
1.2.2. Artificial intelligence	17
1.3. Medicine and biotechnologies	23
1.3.1. Human spare parts and augmented human	25
1.3.2. Ambient assisted living	26
1.3.3. Biotechnology	27
1.4. Nanotechnologies	30
1.4.1. Biological risks of nanoparticles	32
1.5. Agriculture and food industry	33
1.6. Knowledge city, smart city, green city and wise city	38
1.7. Tourism and business travel	41
1.8. Fashion victims	41
1.9. Responsible innovation?	43
1.9.1. What alternative?	45

CHAPTER 2. INNOVATION ECOSYSTEMS	49
2.1. The innovation biosphere.	49
2.2. Some definitions	52
2.3. Innovation life	58
2.3.1. Continuous innovation and its context	58
2.3.2. Innovation dynamics	60
2.3.3. Balance: conditions for sustainable success	63
2.3.4. Role of knowledge and skills	70
2.4. Barriers, constraints and paradoxes.	74
2.5. Some paradoxes	76
2.6. Measuring benefits	78
2.7. Trends and future innovation	79
CHAPTER 3. CHALLENGES AND INNOVATION POLICIES.	81
3.1. Challenges for the next decades.	81
3.2. Main challenges: global, European and French perspectives	83
3.2.1. Challenges for Europe	85
3.2.2. Unemployment paradoxes and quick fixes	87
3.2.3. Challenge for France	91
3.2.4. Best practices in matching offer and demand	94
3.3. Innovation policy	95
3.3.1. Innovation policies in Europe.	100
3.3.2. French innovation policy	113
3.4. Matching policy and challenges.	118
CHAPTER 4. EXPERIMENTATIONS AND RESULTS	123
4.1. Ubiquitous or sustainable innovation.	123
4.2. Selected actions around the world	124
4.2.1. Open Systems Science: Tokyo and Paris	129
4.2.2. Qatar Foundation	135
4.3. Europe	137
4.3.1. From Living Labs and Enoll to Innovation 2.0	137
4.3.2. Future Centers.	144
4.3.3. Green and eco-innovation.	150
4.3.4. Social and service innovation.	152
4.4. Experiments in France	153
4.4.1. Merging for multidisciplinary (and cost saving).	156
4.5. Results and perspectives	157

CHAPTER 5. ENVIRONMENT AND SUSTAINABLE SUCCESS	159
5.1. Know, appreciate and protect what we have	159
5.2. Problem solving	161
5.2.1. Motivation	162
5.2.2. Understanding the problem to solve	163
5.2.3. Solutions from the past and alternative solutions	163
5.3. Innovating in harmony with environmental intelligence	164
5.3.1. Minds of plants	165
5.3.2. Copying nature: biomimicry	167
5.4. Conditions for sustainable success	173
5.4.1. Removing the barriers	177
5.4.2. New professions: perspective for jobs.	179
CONDITIONS FOR A SUSTAINABLE FUTURE	181
BIBLIOGRAPHY	185
INDEX	201
