Preface	11
1 Equations Governing the Vibrations of Thin Structures	15
1.1 Introduction	15
1.1.1 General Considerations on Thin Structures	15
1.1.2 Overview of the Energy Method	16
1.2 Thin Plates	17
1.2.1 Plate with Constant Thickness	18
1.2.2 Plate with Variable Thickness	25
1.2.3 Boundary with an Angular Point	27
1.3 Beams	29
1.4 Circular Cylindrical Shells	31
1.5 Spherical Shells	38
1.5.1 Approximation of the Strain and Stress Tensors and Ap- plication of the Virtual Works Theorem	39
1.5.2 Regularity Conditions at the Apexes	46
1.6 Variational Form of the Equations Governing Harmonic Vibra- tions of Plates and Shells	49
1.6.1 Variational Form of the Plate Equation	50
1.6.2 Variational Form of the Shells Equations	51
1.7 Exercises	52
2 Vibratory Response of Thin Structures <i>in vacuo</i>: Resonance Modes, Forced Harmonic Regime, Transient Regime	53
2.1 Introduction	53
2.2 Vibrations of Constant Cross-Section Beams	55
2.2.1 Independent Solutions for the Homogenous Beam Equation	55

8 Vibrations and Acoustic Radiation of Thin Structures

2.2.2	Response of an Infinite Beam to a Point Harmonic Force	57
2.2.3	Resonance Modes of Finite Length Beams	59
2.2.4	Response of a Finite Length Beam to a Harmonic Force	66
2.3	Vibrations of Plates	68
2.3.1	Free Vibrations of an Infinite Plate	68
2.3.2	Green's Kernel and Green's function for the Time Harmonic Plate Equation and Response of an Infinite Plate to a Harmonic Excitation	71
2.3.3	Harmonic Vibrations of a Plate of Finite Dimensions: General Definition and Theorems	73
2.3.4	Resonance Modes and Resonance Frequencies of Circular Plates with Uniform Boundary Conditions	76
2.3.5	Resonance Modes and Resonance Frequencies of Rectangular Plates with Uniform Boundary Conditions	84
2.3.6	Response of a Plate to a Harmonic Excitation: Resonance Modes Series Representation	97
2.3.7	Boundary Integral Equations and the Boundary Element Method	99
2.3.8	Resonance Frequencies of Plates with Variable Thickness	117
2.3.9	Transient Response of an Infinite Plate with Constant Thickness	119
2.4	Vibrations of Cylindrical Shells	122
2.4.1	Free Oscillations of Cylindrical Shells of Infinite Length	122
2.4.2	Green's Tensor for the Cylindrical Shell Equation	126
2.4.3	Harmonic Vibrations of a Cylindrical Shell of Finite Dimensions: General Definition and Theorems	129
2.4.4	Resonance Modes of a Cylindrical Shell Closed by Shear Diaphragms at Both Ends	130
2.4.5	Resonance Modes of a Cylindrical Shell Clamped at Both Ends	133
2.4.6	Response of a Cylindrical Shell to a Harmonic Excitation: Resonance Modes Representation	137
2.4.7	Boundary Integral Equations and Boundary Element Method	138
2.5	Vibrations of Spherical Shells	141
2.5.1	General Definition and Theorems	141
2.5.2	Solution of the Time Harmonic Spherical Shell Equation	143
2.6	Exercises	145
3	Acoustic Radiation and Transmission by Thin Structures	149
3.1	Introduction	149
3.2	Sound Transmission Across a Piston in a One-Dimensional Waveguide	151

3.2.1	Governing Equations	151
3.2.2	Time Fourier Transform of the Equations – Response of the System to a Harmonic Excitation	153
3.2.3	Response of the System to a Transient Excitation of the Piston	159
3.3	A One-dimensional Example of a Cavity Closed by a Vibrating Boundary	160
3.3.1	Equations Governing Free Harmonic Oscillations and their Reduced Form	161
3.3.2	Transmission of Sound Across the Vibrating Boundary .	165
3.4	A Little Acoustics	168
3.4.1	Variational Form of the Wave Equation and of the Helmholtz Equation	168
3.4.2	Free-field Green’s Function of the Helmholtz Equation .	170
3.4.3	Series Expansions of the Free Field Green’s Function of the Helmholtz Equation	170
3.4.4	Green’s Formula for the Helmholtz Operator and Green’s Representation of the Solution of the Helmholtz Equation	172
3.4.5	Numerical Difficulties	175
3.5	Infinite Structures	176
3.5.1	Infinite Plate in Contact with a Single Fluid or Two Different Fluids	176
3.5.2	Free Oscillations of an Infinite Circular Cylindrical Shell Filled with a <i>vacuum</i> and Immersed in a Fluid of Infinite Extent	196
3.5.3	A Few Remarks on the Free Oscillations of an Infinite Circular Cylindrical Shell containing a Fluid and Immersed in a Second Fluid of Infinite Extent	202
3.6	Baffled Rectangular Plate	203
3.6.1	General Theory: Eigenmodes, Resonance Modes, Series Expansion of the Response of the System	203
3.6.2	Rectangular Plate Clamped along its Boundary: Numerical Approximation of the Resonance Modes	209
3.6.3	Application: Transient Response of a Plate Struck by a Hammer	222
3.7	General Method for the Harmonic Regime: Classical Variational Formulation and Green’s Representation of the Plate Displacement	224
3.8	Baffled Plate Closing a Cavity	228
3.8.1	Equations Governing the Harmonic Motion of the Plate-Cavity-External Fluid System	229

10 Vibrations and Acoustic Radiation of Thin Structures

3.8.2	Integro-differential Equation for the Plate Displacement and Matched Asymptotic Expansions	232
3.8.3	Boundary Integral Representation of the Interior Acoustic Pressure	237
3.8.4	Comparison between Numerical Predictions and Experiments	238
3.9	Cylindrical Finite Length Baffled Shell Excited by a Turbulent Internal Flow	243
3.9.1	Basic Equations and Green's Representations of the Exterior and Interior Acoustic Pressures for a Normal Point Force	245
3.9.2	Numerical Methods for Solving Equations (3.111)	246
3.9.3	Comparison Between Numerical Results and Experimental Data	248
3.10	Radiation by a Finite Length Cylindrical Shell Excited by an Internal Acoustic Source	251
3.10.1	Statement of the Problem	251
3.10.2	Boundary Integral Representations of the Radiated Pressure and of the Shell Displacement	253
3.10.3	Green's Representation of the Interior Acoustic Pressure and Matched Asymptotic Expansions	256
3.10.4	Directivity Pattern of the Radiated Acoustic Pressure	260
3.10.5	Numerical Method, Results and Concluding Remarks	262
3.11	Diffraction of a Transient Acoustic Wave by a <i>Line 2'</i> Shell	264
3.11.1	Statement of the Problem	266
3.11.2	Resonance Modes and Response of the System to an Incident Transient Acoustic Wave	272
3.11.3	Numerical Method and Comparison between Numerical Prediction and Experimental Results	274
3.12	Exercises	278
	Bibliography	279
	Notations	285
	Index	287
