

## Table of Contents

<b>Foreword</b> . . . . .	ix
<b>Acknowledgments</b> . . . . .	xi
<b>Introduction</b> . . . . .	xiii
<b>Chapter 1. Optical Waveguide Theory</b> . . . . .	1
1.1. Principles of optics . . . . .	2
1.1.1. Total reflection phenomenon . . . . .	2
1.1.2. Parallel-face plate . . . . .	4
1.2. Guided wave study . . . . .	5
1.2.1. General description . . . . .	5
1.2.2. Step index planar waveguide . . . . .	7
1.2.3. Graded index planar waveguide . . . . .	21
1.3. Channel waveguides . . . . .	28
1.3.1. Effective index method . . . . .	30
1.4. Light propagation in anisotropic media . . . . .	33
1.5. Bibliography . . . . .	35
<b>Chapter 2. Optical Waveguide Fabrication Techniques</b> . . . . .	39
2.1. Optical waveguide fabrication techniques . . . . .	40
2.1.1. Thin film deposition techniques . . . . .	40
2.1.2. Substitution techniques . . . . .	44
2.2. Integrated optic materials . . . . .	59
2.2.1. Glass . . . . .	60
2.2.2. Organic materials . . . . .	60
2.2.3. Dielectric materials . . . . .	61
2.2.4. Semiconductor materials . . . . .	64
2.2.5. SiO <sub>2</sub> /Si materials . . . . .	65

2.2.6. New non-linear crystals . . . . .	65
2.3. Bibliography . . . . .	69
<b>Chapter 3. Optical Waveguide Characterization Techniques . . . . .</b>	<b>77</b>
3.1. Coupling techniques. . . . .	77
3.1.1. Transversal coupling . . . . .	77
3.1.2. Longitudinal coupling . . . . .	80
3.2. “ <i>m</i> -lines” spectroscopy . . . . .	89
3.2.1. The experimental setup . . . . .	89
3.2.2. Experimental arrangement . . . . .	91
3.2.3. Measurement accuracy. . . . .	93
3.2.4. Theoretical study of the effective index $N_m$ . . . . .	96
3.2.5. Waveguide parameter determination . . . . .	99
3.3. Optical losses. . . . .	107
3.3.1. Optical losses origin . . . . .	107
3.3.2. Optical loss measurements . . . . .	110
3.3.3. Characterization in near-field microscopy of optical waveguides . . . . .	117
3.4. Bibliography . . . . .	119
<b>Chapter 4. Non-linear Effects in Integrated Optics . . . . .</b>	<b>125</b>
4.1. General considerations . . . . .	126
4.2. Second harmonic generation. . . . .	129
4.2.1. Second harmonic generation in the volume . . . . .	131
4.2.2. Quasi-phase matching (QPM) . . . . .	137
4.2.3. Fabrication of periodically poled structures . . . . .	142
4.3. Second harmonic generation within waveguides. . . . .	154
4.3.1. Overlap integral calculation. . . . .	160
4.4. Non-linear optical characterization of waveguides. . . . .	163
4.4.1. SHG setup . . . . .	163
4.4.2. Second harmonic generation by reflection . . . . .	165
4.4.3. Second harmonic generation in waveguides . . . . .	170
4.5. Parametric non-linear optical effects . . . . .	173
4.5.1. Parametric amplification. . . . .	173
4.5.2. Optical parametric oscillation (OPO) . . . . .	174
4.6. Laser sources based on non-linear optics . . . . .	177
4.7. Bibliography . . . . .	182
<b>Chapter 5. The Electro-optic Effect in Waveguides . . . . .</b>	<b>187</b>
5.1. Introduction. . . . .	187
5.2. The electro-optic effect . . . . .	188
5.2.1. The case of $\text{LiNbO}_3$ . . . . .	193
5.3. The electro-optic effect in waveguides. . . . .	200

5.3.1. Analysis of the electric field distribution . . . . .	202
5.4. Electro-optic measurement techniques . . . . .	209
5.4.1. The Mach-Zehnder interferometer . . . . .	209
5.4.2. The polarization change technique . . . . .	211
5.4.3. Angular displacement of guided modes (AnDiGM) technique . . . . .	213
5.5. Optical devices using the electro-optic effect . . . . .	222
5.5.1. Phase modulators . . . . .	223
5.5.2. Intensity modulators . . . . .	225
5.6. Integrated optic setups using the electro-optic effect . . . . .	235
5.6.1 Optimal design of the electrodes for integrated EO modulators . . . . .	235
5.6.2. Integrated EO phase modulator . . . . .	238
5.6.3. Integrated EO intensity modulator (Mach-Zehnder) . . . . .	240
5.7. Modulation in optical networks: state-of-the-art . . . . .	248
5.8. Bibliography . . . . .	254
<b>Chapter 6. Photonic Crystal Waveguides . . . . .</b>	<b>261</b>
6.1. Dispersion relation . . . . .	262
6.1.1. Dispersion relation of an isotropic medium . . . . .	262
6.1.2. Dispersion relation of an anisotropic medium . . . . .	264
6.1.3. Dispersion relation in waveguides . . . . .	265
6.2. Photonic crystals . . . . .	267
6.2.1. Definitions . . . . .	267
6.2.2. Bragg's mirror . . . . .	270
6.2.3. Photonic crystal geometries . . . . .	272
6.2.4. 2D photonic crystal cells . . . . .	273
6.2.5. Electron-photon analogy . . . . .	276
6.2.6. Dispersion relation and band structures . . . . .	278
6.2.7. Simulation methods . . . . .	280
6.3. Photonic crystal fabrication techniques . . . . .	290
6.3.1. Etching techniques . . . . .	290
6.3.2. Ion and electron beam lithography . . . . .	293
6.3.3. Laser processing . . . . .	296
6.4. Examples of photonic crystal applications . . . . .	300
6.4.1. Optical micro-sources (point defects) . . . . .	301
6.4.2. Photonic crystal waveguides (linear defects) . . . . .	302
6.4.3. Optical filter . . . . .	303
6.4.4. Hetero-structures . . . . .	304
6.5. Photonic crystals and non-linear optics . . . . .	305
6.6. Bibliography . . . . .	309
<b>Conclusion . . . . .</b>	<b>317</b>
<b>Index . . . . .</b>	<b>321</b>
