Foreword by Louis Schweitzer, Chairman and Chief Executive Officer, Renault	9
Introduction – All Set for an E-journey	13
Chapter 1. The First Information Revolution	17
1.1. Information: the catalyst for the development of the human community	17
1.2. Writing	19
1.3. Counting	20
1.4. Sorting: Hollerith’s tabulating machines.	23
1.5. Europe lagging behind.	24
Chapter 2. From Electromechanics to Electronics	27
2.1. The NCR crucible	27
2.2. A company named CTR	29
2.3. IT: a product of World War II.	30
2.4. IT: a complex, precious and expensive commodity	32
2.4.1. The UNIVAC venture	33
2.4.2. The IBM riposte.	34
2.4.3. The BUNCH.	35
2.5. The trials and tribulations of IT in Europe.	36
2.5.1. France: caught between state intervention and US domination	37
2.5.2. Great Britain’s vanishing greatness	40
2.6. Centralization of IT power and work organization.	42

Chapter 3. The Dawn of the Digital Era	47
3.1. The quest for new freedom.	47
3.2. The colorful saga of major firsts	49
3.2.1. The first micro-computers	50
3.2.2. Sources of inspiration	53
3.2.2.1. PARC.	53
3.2.2.2. MIT.	54
3.2.3. The first groundbreaking software	56
3.2.3.1. The spreadsheet revolution	56
3.2.3.2. An e-mail odyssey	57
3.2.3.3. The birth of Bill Gates and Microsoft.	58
3.2.3.4. The world of games	58
3.2.4. A three-dimensional world	59
3.2.5. Scientific instrumentation through servers: the story of HP	60
3.3. The internet explosion	61
3.3.1. From ARPANET to the web	62
3.3.2. 1993: the official birth of the web	65
Chapter 4. Light and Shade in the Digital World	69
4.1. The family tree of the digital world.	69
4.1.1. Stalwarts undergoing change	69
4.1.1.1. Honor to whom honor is due	70
4.1.1.2. Telephone companies	71
4.1.2. How golden was my Valley!	72
4.1.3. Integrated software editors	74
4.1.4. Microsoft: an entirely separate case	75
4.1.5. The web generation.	77
4.1.6. The inescapable consultants and service providers	78
4.2. The slippery slope	80
4.2.1. The victims of the second wave	80
4.2.2. Ousted leaders	81
4.2.3. Micro-computing <i>à la française</i>	82
4.2.4. Broken promises: could do better!	83
4.3. The engines powering progress in the digital era.	84
4.3.1. Human/machine interface	85
4.3.2. The laws in the new world.	87
4.3.2.1. Moore's Law	88
4.3.2.2. Metcalfe's Law	89
4.3.2.3. Ruettger's Law	89
4.3.2.4. Gilder's Law	89
4.3.2.5. Shannon's Law	89
4.3.3. Machine diversification and interoperability	89

Chapter 5. The Promise and Reality of New Technology	91
5.1. IT effectiveness called into question	91
5.2. The value of IT.	92
5.2.1. IT and economic savings: can the case be closed?.	93
5.2.1.1. The macroeconomic approach	95
5.2.1.2. The microeconomic approach	97
5.3. The IT sector set up as a model	102
5.4. Telecommunications in the eye of the storm	105
5.5. Shifting boundaries and extended companies.	108
5.6. Corporate network players	110
5.6.1. The customer is always right!	110
5.6.2. Marketplaces.	113
5.6.3. Employee-centric	115
5.7. New opportunities and new competition.	117
5.8. The new time/space framework	119
Chapter 6. IT Policies in Efficient Enterprises	121
6.1. Reduce the shortfall between promises and reality.	121
6.2. Shedding light on IT and information systems...	124
6.3. Information governance	126
6.4. Making choices	126
6.4.1. Interoperability	127
6.4.2. Scalability	128
6.4.3. Reversibility and independence <i>vis-à-vis</i> suppliers	128
6.4.4. Predictability of performance	129
6.5. Structuring	130
6.6. Realization	134
6.7. Measurements and monitoring	136
6.7.1. Keys to IT operations.	140
6.7.2. Monitoring maintenance programs and new projects	141
6.8. To do it oneself or ask someone else to do it?	141
6.8.1. The rise of purchased tools	142
6.8.2. The transformation of in-house IT	143
6.8.2.1. Purchasing logic	143
6.8.2.2. The informed decision not to purchase	145
6.8.3. The merciless world of contracts	147
6.9. Sisyphus and security	150

Chapter 7. New Instructions for CIOs	153
7.1. Lessons of the past	154
7.1.1. Key IT issues since 1970, as seen through the eyes of CIGREF reports.	156
7.1.2. With the benefit of hindsight: the major stakes of the 1990s	158
7.2. The CIO's missions	161
7.2.1. The CIO-teacher.	162
7.2.2. The CIO-leader	164
7.2.3. The CIO-manager.	165
Chapter 8. New Vision(s)?	167
8.1. Gurus and a New Economy in a perfect world	167
8.1.1. Shattered dreams?.	168
8.1.2. What remains of the dot-com years?.	169
8.2. The technological outlook	170
8.2.1. What a beautiful world!	170
8.2.2. Open source software: the alternative?	174
8.2.3. Cyborg and the cyberworld: reality and delirium	176
8.3. Citizenship and economic development	177
8.3.1. Unequal access to internet resources.	177
8.3.2. The first hesitant steps towards electronic democracy	181
8.3.2.1. Electronic voting	181
8.3.2.2. Access to public services	182
8.4. Developments in the Third World	184
8.5. Security and freedom: what are the real threats?	184
8.6. Press, media and culture	185
8.7. Health and education	187
Conclusion	191
References and Bibliography	193
