List of Figures	ix
List of Tables	xi
Glossary	xiii
Introduction	xv
Chapter 1. Preliminaries in Decision-Making	1
1.1. Introduction	1
1.2. Decision-making problems	2
1.3. Optimization modeling of a decision problem	3
1.3.1. Notation	4
1.3.2. Features of an optimization problem	5
1.3.3. A didactic example	6
1.4. Game theory modeling of a decision problem	7
1.4.1. Notation	7
1.4.2. The coalition formation problem	8
1.4.3. The stability concepts	10
1.5. Allocation methods	11
1.5.1. Shapley value allocation	11
1.6. Conclusion	12
Chapter 2. Introduction to Supply Chain Management	13
2.1. Introduction	13
2.2. Main elements of the supply chain	13
2.3. Main activities in the supply chain	18
2.3.1. The ordering problem	18

2.3.2. The warehousing problem	19
2.3.3. The transportation problem	19
2.3.4. The inventory problem	20
2.3.5. Computer science applications in supply chain management	21
2.4. Decision levels in the supply chain	22
2.4.1. Strategic level	23
2.4.2. Tactical level	23
2.4.3. Operational level	23
2.5. Conclusion	23
Chapter 3. The Ordering Problem	25
3.1. Introduction	25
3.2. Terminology	26
3.3. The one supplier–one retailer ordering problem	26
3.3.1. An example of the one–one ordering problem	28
3.3.2. Summary	28
3.4. The one supplier–multiple retailers ordering problem	29
3.4.1. Fixed purchasing price	30
3.4.2. An example of the 1 – n ordering problem	30
3.4.3. Quantity-dependent purchasing price	30
3.5. The multiple suppliers–one retailer ordering problem	31
3.6. The multiple suppliers–multiple retailers ordering problem	32
3.7. Conclusion	36
Chapter 4. The Warehousing Problem	37
4.1. Introduction	37
4.2. Problem description	38
4.2.1. Terminology	39
4.2.2. Inputs/outputs of the WP	40
4.2.3. WP variants	40
4.3. WP with variable cost/without conflicts	42
4.3.1. Mathematical formulation	42
4.3.2. An example	42
4.4. WP with fixed cost/without conflicts	44
4.4.1. Mathematical formulation	44
4.4.2. An example	44
4.5. WP with variable cost/with conflicts	46
4.5.1. Mathematical formulation	47
4.5.2. An example	47
4.6. WP with fixed cost/with conflicts	50
4.6.1. Mathematical formulation	50
4.6.2. An example	50
4.7. A DSS design for the warehousing problem	53

4.8. Example	54
4.9. Answer	55
4.10. Conclusion	56
Chapter 5. Inventory Management	57
5.1. Introduction	57
5.2. Definition of inventory management	58
5.3. Purposes of inventory	59
5.4. Inventory modeling	59
5.4.1. Terminology	60
5.4.2. Economic order quantity model	60
5.4.3. Examples	61
5.5. Conclusion	63
Chapter 6. The Delivery in the Supply Chain	65
6.1. Introduction	65
6.2. The delivery process in the SC	67
6.3. Problem description	68
6.3.1. Terminology	70
6.3.2. Inputs/outputs of the delivery	70
6.3.3. Delivery variants	70
6.4. First Variant: delivery with capacitated trucks	70
6.4.1. CVRP specification	71
6.4.2. Mathematical formulation of the CVRP	71
6.5. Second Variant: delivery with time windows	72
6.5.1. VRPTW specification	72
6.5.2. Mathematical formulation of the VRPTW	73
6.6. A real case study: the case of Tunisia	74
6.7. Alternative resolution approaches for the delivery problem	75
6.7.1. A tabu search approach for solving the delivery problem	75
6.7.2. A genetic algorithm for solving the delivery problem	76
6.8. A DSS design for the delivery problem	78
6.9. Conclusion	79
Bibliography	81
