Introduction ix

Part 1. A Systemic Approach to the Organization Based on Knowledge Management and its Tools 1

Chapter 1. Theoretical Anchoring of Knowledge 3

1.1. Individual knowledge and skills 4
1.1.1. Data 4
1.1.2. Information 4
1.1.3. Knowledge 5
1.1.4. Skill 7
1.2. From individual learning to organizational learning 9
1.2.1. Individual learning 9
1.2.2. Organizational learning 13
1.3. Knowledge management 16
1.3.1. Knowledge acquisition 18
1.3.2. Knowledge storage 18
1.3.3. Knowledge transfer 19
1.3.4. Knowledge application 20
1.3.5. Creation of new knowledge 21
1.4. Knowledge management systems 23
1.4.1. Information systems 23
1.4.2. The characteristics of a knowledge management system 24
1.5. Communities, teams and knowledge management 26
1.5.1. Communities 27
1.5.2. Teams 29
1.6. Knowledge management and cultures 31
1.6.1. National culture 32

1.6.2. Organizational culture. 34
1.6.3. Professional culture 35

Chapter 2. The Design of the Learning Organization 37

2.1. From the systemic approach to the organizational design. 37
2.1.1. Systemic approach 37
2.1.2. The "organizational design" school of thought 40
2.2. Proposal of an organizational design for knowledge management: "learning organization design" 44
2.2.1. Classification of works pertaining to knowledge management. 45
2.2.2. The learning organization design 46

Part 2. Emergence of a New Design: that of the Learning Organization 61

Chapter 3. Real-World Access Methodology 63

3.1. Methodological choices 64
3.1.1. Methodology 64
3.1.2. Participant observation 65
3.2. The field of research. 67
3.2.1. Presentation of the research area 68
3.2.2. Stitching together of operational activities into occupational processes 73
3.3. Data collection. 85
3.3.1. Theoretical sampling 85
3.3.2. Data collection. 87
3.4. Processing of the collected data. 92
3.4.1. Thematic content analysis 92
3.4.2. Multi-angular analysis 95

Chapter 4. Case Study 99

4.1. Design of the learning organization SCCC (before the merger) 99
4.1.1. Strategy. 100
4.1.2. Incentive systems. 101
4.1.3. People. 104
4.1.4. Technology: KMS 105
4.1.5. Structure 107
4.2. Design of the learning organization SCCC (period of merger with N) . . 108
4.2.1. Strategy. 108
4.2.2. Incentive systems. 109

4.2.3. People 110
4.2.4. Technology 111
4.2.5. Structure 113
4.3. Design of the learning organization NSN (post-merger). 114
4.3.1. Strategy 114
4.3.2. Incentive systems 115
4.3.3. People 117
4.3.4. Technology 118
4.3.5. Structure 121
4.4. Overview of the three phases. 122

Chapter 5. Emergence of a New Organizational Design 127

5.1. Emergence of a design of the learning organization. 127
5.1.1. Flexibility through integrative devices 127
5.1.2. Consistency/inconsistency in regard to the domain “strategy”. 128
5.1.3. Consistency/inconsistency in regard to the “incentive systems” domain 129
5.1.4. Consistency/inconsistency in regard to the “technology” domain 129
5.1.5. Consistency/inconsistency in regard to the “structure” domain 130
5.2. Emergence of a new organizational design in view of the impact of culture 130
5.3. Emergence of a new organizational design when faced with knowledge boundaries 131
5.3.1. Knowledge boundary management 132
5.3.2. Design of the learning organization in the face of knowledge boundaries. 133

Conclusion. 139
