<b>Introduction . . . . .</b>	<b>xi</b>
Gérard BRULÉ	
<b>Part 1. Food from Animal Sources . . . . .</b>	<b>1</b>
<b>Chapter 1. From Milk to Dairy Products . . . . .</b>	<b>3</b>
Thomas CROGUENNEC, Romain JEANTET and Pierre SCHUCK	
1.1. The biochemistry and physical chemistry of milk . . . . .	3
1.1.1. Milk fat . . . . .	4
1.1.2. Carbohydrates . . . . .	8
1.1.3. Proteins . . . . .	10
1.1.4. Milk minerals . . . . .	15
1.2. Biological and physicochemical aspects of milk processing . . . . .	17
1.2.1. The stability of fat globules . . . . .	17
1.2.2. Protein stability . . . . .	19
1.3. Dairy product technology . . . . .	25
1.3.1. Liquid milk . . . . .	25
1.3.2. Fermented milk products . . . . .	29
1.3.3. Milk powder . . . . .	32
1.3.4. Cheese . . . . .	39
1.3.5. Cream and butter . . . . .	58
<b>Chapter 2. From Muscle to Meat and Meat Products . . . . .</b>	<b>65</b>
Catherine GUÉRIN	
2.1. The biochemistry of muscle (land animals and fish) . . . . .	65
2.1.1. The structure and composition of meat and fish muscle . . . . .	66
2.1.2. Muscle structure . . . . .	73
2.1.3. Proteins . . . . .	78

2.1.4. Carbohydrates . . . . .	88
2.1.5. Vitamins and minerals . . . . .	88
2.2. Biological and physicochemical changes in muscle . . . . .	89
2.2.1. Muscle contraction . . . . .	89
2.2.2. Changes in muscle after death . . . . .	91
2.3. Meat and fish processing technology . . . . .	102
2.3.1. Meat processing technology . . . . .	102
2.3.2. Fish processing technology . . . . .	109
<b>Chapter 3. From Eggs to Egg Products . . . . .</b>	115
Marc ANTON, Valérie LECHEVALIER and Françoise NAU	
3.1. Chicken egg – raw material in the egg industry . . . . .	117
3.1.1. Structure and composition . . . . .	117
3.1.2. Biochemical and physicochemical properties of the protein and lipid fractions of egg . . . . .	120
3.2. Physicochemical properties of the different egg fractions . . . . .	125
3.2.1. Interfacial properties . . . . .	125
3.2.2. Gelling properties . . . . .	131
3.3. The egg industry: technology and products . . . . .	136
3.3.1. Decontamination of shells . . . . .	138
3.3.2. Breaking and separation of the egg white and yolk . . . . .	138
3.3.3. Primary processing of egg products – decontamination and stabilization . . . . .	139
3.3.4. Secondary processing of egg products . . . . .	142
3.3.5. Egg extracts . . . . .	143
<b>Part 2. Food from Plant Sources . . . . .</b>	145
<b>Chapter 4. From Wheat to Bread and Pasta . . . . .</b>	147
Hubert CHIRON and Philippe ROUSSEL	
4.1. Biochemistry and physical chemistry of wheat . . . . .	150
4.1.1. Overall composition . . . . .	150
4.1.2. Structure and properties of the constituents . . . . .	154
4.2. Biological and physicochemical factors of wheat processing . . . . .	163
4.2.1. Development of texture . . . . .	164
4.2.2. Development of color and flavor . . . . .	170
4.3. The technology of milling, bread making and pasta making . . . . .	172
4.3.1. Processing of wheat into flour and semolina . . . . .	172
4.3.2. Bread making . . . . .	180
4.3.3. Pasta making . . . . .	195

---

<b>Chapter 5. From Barley to Beer . . . . .</b>	<b>205</b>
Romain JEANTET and Ludivine PERROCHEAU	
5.1. Biochemistry and structure of barley and malt . . . . .	205
5.1.1. Morphology of barley grain . . . . .	206
5.1.2. Biochemical composition of barley . . . . .	207
5.1.3. Composition and structure of starch and protein . . . . .	208
5.1.4. Effect of malting . . . . .	209
5.2. Biological and physicochemical factors of processing . . . . .	213
5.2.1. Enzymatic degradation of starch and protein . . . . .	214
5.2.2. Fermentability of the wort . . . . .	220
5.3. Brewing technology . . . . .	221
5.3.1. Stages of malting . . . . .	221
5.3.2. Stages of beer production . . . . .	224
<b>Chapter 6. From Fruit to Fruit Juice and Fermented Products . . . . .</b>	<b>231</b>
Alain BARON, Mohammad TURK and Jean-Michel Le QUÉRÉ	
6.1. Fruit development . . . . .	231
6.1.1. Stages of development . . . . .	231
6.1.2. Fruit ripening . . . . .	233
6.2. Biochemistry of fruit juice . . . . .	237
6.2.1. Pectins . . . . .	238
6.2.2. Pectinolytic enzymes . . . . .	241
6.2.3. Bitter and astringent compounds . . . . .	245
6.3. Fruit juice processing . . . . .	249
6.3.1. Preparation of fruit . . . . .	249
6.3.2. Pre-treatment . . . . .	250
6.3.3. Pressing . . . . .	250
6.3.4. Treatment of fruit juice . . . . .	253
6.3.5. Pasteurization, high-pressure treatment, pulsed electric fields and concentration . . . . .	262
6.4. Cider . . . . .	264
6.4.1. French cider . . . . .	264
6.4.2. Fermentation process . . . . .	265
6.4.3. Action of microorganisms . . . . .	267
6.4.4. Fermentation and post-fermentation . . . . .	271
<b>Chapter 7. From Grape to Wine . . . . .</b>	<b>275</b>
Thomas CROGUENNEC	
7.1. Raw materials . . . . .	276
7.1.1. Grape variety . . . . .	276
7.1.2. Composition of grapes . . . . .	276

---

7.2. Winemaking techniques . . . . .	280
7.2.1. State of the harvest and adjustments . . . . .	281
7.2.2. Physicochemical processes involved in winemaking . . . . .	282
7.2.3. Biological processes involved in winemaking: fermentation . . . . .	285
7.3. Stabilization and maturation of wine . . . . .	289
7.3.1. Biological stabilization . . . . .	289
7.3.2. Physicochemical stabilization . . . . .	290
7.3.3. Maturation of wine . . . . .	291
7.4. Specific technology . . . . .	292
7.4.1. Sparkling wines (traditional method) . . . . .	292
7.4.2. Sweet wines . . . . .	293
<b>Chapter 8. From Fruit and Vegetables to Fresh-Cut Products . . . . .</b>	<b>297</b>
Florence CHARLES and Patrick VAROQUAUX	
8.1. Respiratory activity of plants . . . . .	298
8.1.1. Measurement and modeling of respiratory activity . . . . .	299
8.1.2. Control of respiratory activity . . . . .	301
8.2. Enzymatic browning . . . . .	302
8.2.1. Mechanism and evaluation . . . . .	302
8.2.2. Prevention of enzymatic browning . . . . .	303
8.3. Unit operations in the production of fresh-cut products: main scientific and technical challenges . . . . .	304
8.3.1. Raw materials: selection of varieties and cultivation methods . . . . .	306
8.3.2. Raw material quality control: grading . . . . .	307
8.3.3. Trimming and mixing . . . . .	307
8.3.4. Cutting . . . . .	308
8.3.5. Washing and disinfection . . . . .	309
8.3.6. Draining and drying . . . . .	312
8.3.7. Weighing . . . . .	313
8.3.8. Bagging . . . . .	313
8.4. Modified atmosphere packaging . . . . .	314
8.4.1. Diffusion of gases through packaging . . . . .	315
8.4.2. Change in gas content in modified atmosphere packaging . . . . .	317
8.5. Conclusion . . . . .	319

---

<b>Part 3. Food Ingredients . . . . .</b>	321
<b>Chapter 9. Functional Properties of Ingredients . . . . .</b>	323
Gérard BRULÉ and Thomas CROGUENNEC	
9.1. Interactions with water: hydration and thickening properties . . . . .	324
9.1.1. Types of interaction . . . . .	324
9.1.2. Influence of hydrophilic components on water availability and mobility . . . . .	325
9.1.3. Influence of hydration on the solubilization, structure and mobility of compounds . . . . .	325
9.1.4. Effect of the hydration of components on rheological properties . . . . .	326
9.2. Intermolecular interactions: texture properties . . . . .	326
9.2.1. Aggregation/gelation by destabilization of macromolecules or particles . . . . .	326
9.2.2. Aggregation/gelation by covalent cross-linking . . . . .	327
9.2.3. Sol–gel transitions . . . . .	329
9.2.4. Influence of denaturation kinetics and molecular interactions . . . . .	329
9.3. Interfacial properties: foaming and emulsification . . . . .	330
9.3.1. Interfacial tension . . . . .	330
9.3.2. Surfactants . . . . .	332
9.3.3. Emulsification and foaming . . . . .	332
<b>Chapter 10. Separation Techniques . . . . .</b>	335
Thomas CROGUENNEC and Valérie LECHEVALIER	
10.1. Proteins and peptides . . . . .	335
10.1.1. Milk proteins and peptides . . . . .	335
10.1.2. Extraction of lysozyme from egg white . . . . .	346
10.1.3. Extraction of gelatin . . . . .	348
10.1.4. Plant proteins . . . . .	349
10.2. Carbohydrates . . . . .	351
10.2.1. Sucrose . . . . .	351
10.2.2. Lactose . . . . .	364
10.2.3. Polysaccharides . . . . .	369
10.3. Lipids . . . . .	378
10.3.1. Production of vegetable oils . . . . .	379
10.3.2. Lipid modification . . . . .	383
10.4. Pigments and flavorings . . . . .	391
10.4.1. Types of pigments and flavorings . . . . .	391

---

10.4.2. Extraction/concentration of colorings and flavors. . . . .	397
10.4.3. Formulation . . . . .	400
<b>Bibliography. . . . .</b>	<b>403</b>
<b>List of Authors . . . . .</b>	<b>417</b>
<b>Index . . . . .</b>	<b>419</b>
