<b>PREFACE</b> . . . . .	ix
<b>INTRODUCTION</b> . . . . .	xi
<b>CHAPTER 1. INTEGRAL EQUATIONS FOR A SINGLE SCATTERER: METHOD OF MOMENTS AND ROUGH SURFACES</b> . . . . .	1
1.1. Introduction . . . . .	1
1.2. Integral equations . . . . .	2
1.2.1. TE and TM polarizations and boundary conditions . . . . .	2
1.2.2. Electric and magnetic currents for a 2D problem . . . . .	3
1.2.3. Huygens' principle and extinction theorem . . . . .	4
1.2.4. Radar cross-section (RCS) . . . . .	8
1.2.5. Normalized radar cross-section (NRCS) . . . . .	10
1.3. Method of moments with point-matching method . . . . .	12
1.4. Application to a surface . . . . .	14
1.4.1. The Dirichlet boundary conditions . . . . .	14
1.4.2. The Neumann boundary conditions . . . . .	16
1.4.3. General case . . . . .	17
1.4.4. Impedance boundary condition . . . . .	18
1.5. Forward–Backward (FB) method . . . . .	19
1.6. Random rough surface generation . . . . .	21
1.6.1. Statistical parameters . . . . .	21
1.6.2. Generation of a random profile . . . . .	23
1.6.3. Simulations . . . . .	26
1.6.4. Conclusion . . . . .	30

<b>CHAPTER 2. VALIDATION OF THE METHOD OF MOMENTS FOR A SINGLE SCATTERER</b> . . . . .	31
2.1. Introduction . . . . .	31
2.2. Solutions of a scattering problem . . . . .	31
2.3. Comparison with the exact solution of a circular cylinder in free space . . . . .	34
2.3.1. Solution of the Helmholtz equation . . . . .	35
2.3.2. Dirichlet boundary conditions . . . . .	37
2.3.3. Neumann boundary conditions . . . . .	39
2.3.4. Dielectric cylinder . . . . .	42
2.3.5. MoM for an elliptical cylinder . . . . .	45
2.3.6. Numerical comparisons for a circular cylinder . . . . .	47
2.3.7. Conclusion . . . . .	54
2.4. PO approximation . . . . .	55
2.4.1. Formulation . . . . .	55
2.4.2. Applications . . . . .	56
2.4.3. Sea-like surface . . . . .	66
2.5. FB method . . . . .	69
2.6. Conclusion . . . . .	71
<b>CHAPTER 3. SCATTERING FROM TWO ILLUMINATED SCATTERERS</b> . . . . .	73
3.1. Introduction . . . . .	73
3.2. Integral equations and method of moments . . . . .	75
3.2.1. Integral equations for two scatterers . . . . .	75
3.2.2. Method of moments for two scatterers . . . . .	77
3.2.3. Method of moments for $P$ scatterers . . . . .	84
3.3. Efficient inversion of the impedance matrix: E-PILE method for two scatterers . . . . .	86
3.3.1. Mathematical formulation . . . . .	86
3.3.2. Numerical results . . . . .	89
3.4. E-PILE method combined with PO and FB . . . . .	94
3.4.1. E-PILE hybridized with FB . . . . .	94
3.4.2. E-PILE hybridized with PO . . . . .	96
3.5. Conclusion . . . . .	107

---

<b>CHAPTER 4. SCATTERING FROM TWO SCATTERERS WHERE ONLY ONE IS ILLUMINATED</b> . . . . .	109
4.1. Introduction . . . . .	109
4.2. Integral equations and method of moments . . . . .	110
4.2.1. Integral equations . . . . .	110
4.2.2. Method of moments . . . . .	113
4.2.3. Case for which scatterer 2 is perfectly conducting . . . . .	116
4.2.4. Numerical results . . . . .	117
4.3. Efficient inversion of the impedance matrix: PILE method . . . . .	122
4.3.1. Mathematical formulation . . . . .	122
4.3.2. Numerical results . . . . .	123
4.4. PILE method combined with FB or PO . . . . .	128
4.4.1. PILE hybridized with FB . . . . .	128
4.4.2. PILE hybridized with PO . . . . .	130
4.5. Conclusion . . . . .	138
<b>APPENDIX. MATLAB CODES</b> . . . . .	139
<b>BIBLIOGRAPHY</b> . . . . .	141
<b>INDEX</b> . . . . .	147
