<b>Foreword</b> . . . . .	xv
José DEL R. MILLÁN	
<b>Introduction</b> . . . . .	xvii
Maureen CLERC, Laurent BOUGRAIN and Fabien LOTTE	
<b>Part 1. Fields of Application</b> . . . . .	1
<b>Chapter 1. Brain–Computer Interfaces in Disorders of Consciousness</b> . . . . .	3
Jérémie MATTOUT, Jacques LUAUTÉ, Julien JUNG and Dominique MORLET	
1.1. Introduction . . . . .	3
1.2. Altered states of consciousness: etiologies and clinical features . . . . .	4
1.2.1. From coma to awakening . . . . .	4
1.2.2. The importance of differential diagnosis . . . . .	5
1.3. Functional assessment of patients with altered states of consciousness (passive paradigms) . . . . .	6
1.3.1. Prognosis of coma outcome . . . . .	6
1.3.2. Functional patterns in postcoma states . . . . .	9
1.4. Advanced approaches to assessing consciousness (active paradigms) . . . . .	12
1.5. Toward the real-time use of functional markers . . . . .	15
1.5.1. Real-time approaches to communication . . . . .	16

1.5.2. The benefit of BCIs in disorders of consciousness for purposes other than communication . . . . .	18
1.6. Conclusion and future outlook . . . . .	19
1.7. Bibliography . . . . .	21

## **Chapter 2. Medical Applications: Neuroprostheses and Neurorehabilitation . . . . . 29**

Laurent BOUGRAIN

2.1. Motor deficiencies . . . . .	30
2.1.1. Brain motor deficiencies . . . . .	30
2.1.2. Neuromuscular motor deficiencies . . . . .	30
2.1.3. Neurodegenerative motor deficiencies . . . . .	31
2.1.4. Medullary motor deficiencies . . . . .	32
2.1.5. Osteoarticular motor deficiencies . . . . .	32
2.2. Compensating for motor deficiency . . . . .	32
2.2.1. Neuroprostheses . . . . .	33
2.2.2. Neurorehabilitation . . . . .	36
2.3. Conclusions . . . . .	39
2.4. Bibliography . . . . .	39

## **Chapter 3. Medical Applications of BCIs for Patient Communication . . . . . 43**

François CABESTAING and Louis MAYAUD

3.1. Introduction . . . . .	43
3.1.1. Augmentative and alternative communication . . . . .	44
3.1.2. Logical and semantic control . . . . .	45
3.1.3. BCIs dedicated to AAC . . . . .	46
3.1.4. Estimating the performance of BCIs dedicated to AAC . . . . .	47
3.2. Reactive interfaces for communication . . . . .	49
3.2.1. Visual interfaces . . . . .	49
3.2.2. Auditory stimulation . . . . .	53
3.3. Active interfaces for communication . . . . .	53
3.3.1. Thought translation device . . . . .	55
3.3.2. BrainTree interface . . . . .	57
3.4. Conclusions . . . . .	59
3.5. Bibliography . . . . .	60

---

<b>Chapter 4. BrainTV: Revealing the Neural Bases of Human Cognition in Real Time</b> . . . . .	65
Jean-Philippe LACHAUX	
4.1. Introduction and motivation . . . . .	65
4.2. Toward first person data accounting . . . . .	66
4.3. Bringing subjective and objective data into the same space: conscious experience of the subject . . . . .	69
4.4. Technical aspects: the contribution of brain–computer interfaces	70
4.5. The BrainTV system and its applications . . . . .	75
4.5.1. Application of BrainTV in fundamental research . . . . .	76
4.5.2. BrainTV clinical applications . . . . .	80
4.6. BrainTV limitations . . . . .	81
4.7. Extension to other types of recordings . . . . .	82
4.8. Conclusions . . . . .	82
4.9. Bibliography . . . . .	83
<b>Chapter 5. BCIs and Video Games: State of the Art with the OpenViBE2 Project</b> . . . . .	85
Anatole LÉCUYER	
5.1. Introduction . . . . .	85
5.2. Video game prototypes controlled by BCI . . . . .	88
5.2.1. Video game based on the imagination of movement . . . . .	88
5.2.2. Video game based on P300 potential . . . . .	89
5.2.3. Video game based on SSVEP potential . . . . .	91
5.2.4. Video game based on concentration/relaxation tasks . . . . .	91
5.3. Industrial prototypes: the potential for very different kinds of games . . . . .	93
5.3.1. Classical games for entertainment or “casual games” . . . . .	93
5.3.2. Brain-training games or “Brain Trainers” . . . . .	94
5.3.3. “Serious games” . . . . .	95
5.4. Discussion . . . . .	96
5.5. Conclusion . . . . .	98
5.6. Bibliography . . . . .	98

---

<b>Part 2. Practical Aspects of BCI Implementation</b> . . . . .	101
<b>Chapter 6. Analysis of Patient Need for Brain–Computer Interfaces</b> . . . . .	103
Louis MAYAUD, Salvador CABANILLES and Eric AZABOU	
6.1. Introduction . . . . .	103
6.1.1. Patient groups . . . . .	104
6.1.2. Existing interfaces . . . . .	106
6.2. Types of users . . . . .	108
6.2.1. Patient needs . . . . .	110
6.2.2. Carers . . . . .	113
6.3. Interpretation of needs in BCI usage contexts . . . . .	113
6.3.1. Physical interfaces for reading brain activity . . . . .	114
6.3.2. Analysis of brain activity . . . . .	115
6.3.3. Applications and user interfaces . . . . .	116
6.4. Conclusions . . . . .	117
6.5. Bibliography . . . . .	119
<b>Chapter 7. Sensors: Theory and Innovation</b> . . . . .	123
Jean-Michel BADIÉ, Thomas LONJARET and Pierre LELEUX	
7.1. EEG electrodes . . . . .	125
7.1.1. Electrochemical model of the electrode . . . . .	125
7.1.2. Electrodes in electrophysiology . . . . .	126
7.1.3. Characterization of electrodes . . . . .	126
7.1.4. EEG electrode matrices and headsets . . . . .	127
7.2. Invasive recording . . . . .	128
7.2.1. The need for invasive recording techniques . . . . .	128
7.2.2. Electrocorticography . . . . .	129
7.2.3. Stereoelectroencephalography . . . . .	129
7.3. Latest generation sensors . . . . .	130
7.3.1. Innovative substrate materials . . . . .	130
7.3.2. Interface materials . . . . .	132
7.3.3. Interface topography . . . . .	133
7.3.4. Active sensors . . . . .	135
7.4. Magnetoencephalography . . . . .	137
7.4.1. The source of the signal . . . . .	137
7.4.2. Equipment . . . . .	138
7.5. Conclusions . . . . .	139
7.6. Bibliography . . . . .	140

---

<b>Chapter 8. Technical Requirements for High-quality EEG Acquisition</b> . . . . .	143
Emmanuel MABY	
8.1. Electrodes . . . . .	144
8.1.1. Passive electrodes . . . . .	144
8.1.2. Active electrodes . . . . .	145
8.2. Montages . . . . .	145
8.2.1. Monopolar montage . . . . .	145
8.2.2. Bipolar montage . . . . .	146
8.2.3. Ground electrode . . . . .	146
8.3. Amplifiers . . . . .	147
8.3.1. Gain . . . . .	147
8.3.2. Differential amplifier . . . . .	148
8.4. Analog filters . . . . .	152
8.5. Analog-to-digital conversion . . . . .	152
8.6. Event synchronization with the EEG . . . . .	155
8.6.1. Hardware marking of events . . . . .	156
8.6.2. Software marking of events . . . . .	158
8.7. Conclusions . . . . .	159
8.8. Bibliography . . . . .	160
<b>Chapter 9. Practical Guide to Performing an EEG Experiment</b> . . . . .	163
Emmanuel MABY	
9.1. Study planning . . . . .	163
9.1.1. Legislation and ethics . . . . .	163
9.1.2. Subject selection criteria . . . . .	164
9.1.3. Experiment organization . . . . .	165
9.2. Equipment . . . . .	166
9.2.1. Recording site . . . . .	166
9.2.2. Stimulation system . . . . .	169
9.2.3. Acquisition system . . . . .	170
9.3. Experiment procedure . . . . .	170
9.3.1. Recruiting of subjects . . . . .	171
9.3.2. The day before the experiment . . . . .	171
9.3.3. The day of the experiment . . . . .	172
9.3.4. After the experiment . . . . .	176
9.4. Bibliography . . . . .	177

**Part 3 . Step by Step Guide to BCI Design with OpenViBE . . . 179****Chapter 10. OpenViBE and Other BCI Software Platforms . . . 181**

Jussi LINDGREN and Anatole LECUYER

10.1. Introduction . . . . .	181
10.2. Using BCI for control . . . . .	183
10.3. BCI processing stages . . . . .	184
10.4. Exploring BCI . . . . .	187
10.5. Comparison of platforms . . . . .	189
10.5.1. OpenViBE . . . . .	190
10.5.2. BCI2000 . . . . .	192
10.5.3. Matlab-based platforms . . . . .	193
10.6. Choosing a platform . . . . .	195
10.7. Conclusion . . . . .	196
10.8. Bibliography . . . . .	197

**Chapter 11. Illustration of Electrophysiological Phenomena with OpenViBE . . . . . 199**

Fabien LOTTE and Alison CELLARD

11.1. Visualization of raw EEG signals and artifacts . . . . .	200
11.1.1. Visualization of raw EEG signals . . . . .	200
11.1.2. Visualization of EOG and EMG artifacts . . . . .	201
11.2. Visualization of alpha oscillations . . . . .	201
11.3. Visualization of the beta rebound . . . . .	203
11.4. Visualization of the SSVEP . . . . .	206
11.5. Conclusions . . . . .	208
11.6. Bibliography . . . . .	209

**Chapter 12. Classification of Brain Signals with OpenViBE . . . . . 211**

Laurent BOUGRAIN and Guillaume SERRIÈRE

12.1. Introduction . . . . .	211
12.2. Classification . . . . .	212
12.2.1. Classification algorithms . . . . .	212
12.2.2. Classification strategies . . . . .	214
12.2.3. Illustration of motor imagery recognition . . . . .	215
12.3. Evaluation . . . . .	216
12.3.1. Measures . . . . .	216

---

12.3.2. Validation data . . . . .	221
12.3.3. Illustration of the performance metrics . . . . .	224
12.4. Conclusions . . . . .	224
12.5. Bibliography . . . . .	224
<b>Chapter 13. OpenViBE Illustration of a P300 Virtual Keyboard . . . . .</b>	<b>227</b>
Nathanaël FOY, Théodore PAPADOPOULO and Maureen CLERC	
13.1. Target/non-target classification . . . . .	228
13.1.1. The average model . . . . .	228
13.1.2. Linear discriminant analysis and the overtraining issue . . . . .	230
13.1.3. Dimension reduction with xDAWN spatial filtering . . . . .	232
13.2. Illustration of a P300 virtual keyboard . . . . .	235
13.2.1. Detection of P300 with OpenViBE . . . . .	235
13.2.2. Implementation of a P300 speller . . . . .	238
13.3. Bibliography . . . . .	240
<b>Chapter 14. Recreational Applications of OpenViBE: Brain Invaders and Use-the-Force . . . . .</b>	<b>241</b>
Anton ANDREEV, Alexandre BARACHANT, Fabien LOTTE and Marco CONGEDO	
14.1. Brain Invaders . . . . .	241
14.1.1. Results . . . . .	243
14.1.2. Offline results: “classic” training-test mode . . . . .	244
14.1.3. Offline results: cross-subject initialization . . . . .	245
14.1.4. Offline results: cross-session initialization . . . . .	246
14.1.5. Online results: adaptation . . . . .	246
14.2. Implementation . . . . .	248
14.2.1. Artifact management . . . . .	249
14.2.2. Brain Invaders in OpenViBE . . . . .	249
14.2.3. Notes on technical issues . . . . .	250
14.3. Use-The-Force! . . . . .	251
14.3.1. The BCI system . . . . .	252
14.3.2. Implementation with OpenViBE . . . . .	253
14.3.3. Conclusion on Use-The-Force! . . . . .	255
14.4. Conclusions . . . . .	256
14.5. Bibliography . . . . .	257

**Part 4. Societal Challenges and Perspectives** . . . . . 259**Chapter 15. Ethical Reflections on Brain–Computer Interfaces** . . . . . 261Florent BOCQUELET, Gaëlle PIRET, Nicolas AUMONIER and  
Blaise YVERT

15.1. Introduction . . . . .	262
15.2. The animal . . . . .	264
15.2.1. The fight against pain, suffering and anxiety in animals . . . . .	265
15.2.2. Reflection on the difference between human beings and animals . . . . .	265
15.2.3. Animals are not things . . . . .	266
15.3. Human beings . . . . .	267
15.3.1. Addressing the hope aroused . . . . .	267
15.3.2. Risk/benefits ratio . . . . .	268
15.3.3. Informed consent and patient involvement . . . . .	269
15.3.4. Repairing versus replacing . . . . .	270
15.3.5. Accessibility of BCIs . . . . .	271
15.3.6. Modulating brain activity with BCIs: what are the consequences? . . . . .	272
15.3.7. Reliability and safety of BCIs . . . . .	272
15.3.8. Responsibility when using BCIs . . . . .	273
15.4. The human species . . . . .	274
15.4.1. BCIs as bridges between the real and the virtual . . . . .	275
15.4.2. BCIs as future means of enhancement? . . . . .	276
15.4.3. The risk of transhumanism? . . . . .	277
15.4.4. Freedom and BCI . . . . .	278
15.5. Conclusions . . . . .	279
15.5.1. A choice to be made . . . . .	279
15.5.2. Need for constant ethical vigilance of BCIs . . . . .	281
15.6. Bibliography . . . . .	281

**Chapter 16. Acceptance of Brain–machine Hybrids: How  
is Their Brain Perceived *In Vivo*?** . . . . . 289

Bernard ANDRIEU

16.1. Ethical problem . . . . .	289
16.2. The method . . . . .	291

16.3. Ethics of experimentation: Matthew Nagle, the first patient . . . . .	293
16.4. Body language in performance . . . . .	296
16.5. Ethics of autonomous (re)socialization . . . . .	297
16.6. Conclusions . . . . .	303
16.7. Bibliography . . . . .	304
16.8. Appendix (verbatim video retranscriptions) . . . . .	304
<b>Chapter 17. Conclusion and Perspectives . . . . .</b>	<b>311</b>
Maureen CLERC, Laurent BOUGRAIN and Fabien LOTTE	
17.1. Introduction . . . . .	311
17.2. Reinforcing the scientific basis of BCIs . . . . .	314
17.3. Using BCI in practice . . . . .	316
17.4. Opening up BCI technologies to new applications and fields . . . . .	318
17.5. Concern about ethical issues . . . . .	321
17.6. Conclusions . . . . .	321
17.7. Bibliography . . . . .	322
<b>List of Authors . . . . .</b>	<b>325</b>
<b>Index . . . . .</b>	<b>329</b>
<b>Contents of Volume 1 . . . . .</b>	<b>333</b>
