| Chapter 1. Ecosystems of Collective Intelligence in the Service of Digital Archives | 1 |
| Samuel SZONIECKY | |
| 1.1. Digital archives | 1 |
| 1.2. Collective intelligence | 3 |
| 1.3. Knowledge ecosystems | 5 |
| 1.4. Examples of ecosystems of knowledge | 7 |
| 1.4.1. Modeling digital archive interpretation | 7 |
| 1.4.2. Editing archives via the semantic web | 10 |
| 1.4.3. A semantic platform for analyzing audiovisual corpuses | 12 |
| 1.4.4. Digital libraries and crowdsourcing: a state-of-the-art | 14 |
| 1.4.5. Conservation and promotion of cultural heritage. | 16 |
| 1.4.6. Modeling knowledge for innovation. | 18 |
| 1.5. Solutions | 20 |
| 1.6. Bibliography | 21 |
| Chapter 2. Tools for Modeling Digital Archive Interpretation | 23 |
| Muriel LOUÂPRE and Samuel SZONIECKY | |
| 2.1. What archives are we speaking of? Definition, issues and collective intelligence methods | 25 |
| 2.1.1. Database archives, evolution of a concept and its functions | 25 |

| | |
|--|----|
| 2.1.2. The exploitation of digital archives in the humanities | 27 |
| 2.1.3. The specific case of visualization tools | 32 |
| 2.2. Digital archive visualization tools: lessons from the Biographes experiment | 34 |
| 2.2.1. Tools for testing. | 37 |
| 2.2.2. Tools for visualizing networks: DBpedia, Palladio | 38 |
| 2.2.3. Multi-purpose tools (Keshif, Table) | 40 |
| 2.3. Prototype for influence network modeling | 44 |
| 2.3.1. Categorization of relationships | 45 |
| 2.3.2. Assisted influence network entry. | 47 |
| 2.4. Limits and perspectives. | 50 |
| 2.4.1. Epistemological conflicts | 51 |
| 2.4.2. The digital “black box”?. | 55 |
| 2.4.3. From individual expertise to group intelligence | 56 |
| 2.5. Conclusion | 57 |
| 2.6. Bibliography | 58 |
| Chapter 3. From the Digital Archive to the Resource Enriched Via Semantic Web: Process of Editing a Cultural Heritage | 61 |
| Lénaïk LEYOUDEC | |
| 3.1. Influencing the intelligibility of a heritage document | 61 |
| 3.2. Mobilizing differential semantics | 62 |
| 3.3. Applying an interpretive process to the archive | 63 |
| 3.4. Assessment of the semiotic study | 67 |
| 3.5. Popularizing the data web in the editorialization approach. | 70 |
| 3.6. Archive editorialization in the Famille™ architext | 73 |
| 3.7. Assessment of the archive’s recontextualization | 79 |
| 3.8. Bibliography | 81 |
| Chapter 4. Studio Campus AAR: A Semantic Platform for Analyzing and Publishing Audiovisual Corpuses | 85 |
| Abdelkrim BELOUED, Peter STOCKINGER and Steffen LALANDE | |
| 4.1. Introduction. | 85 |
| 4.2. Context and issues. | 86 |

| | |
|--|-----|
| 4.2.1. Archiving and appropriation of audiovisual data | 89 |
| 4.2.2. General presentation of the Campus AAR environment | 94 |
| 4.3. Editing knowledge graphs – the Studio Campus AAR example | 96 |
| 4.3.1. Context | 97 |
| 4.3.2. Representations of OWL2 restrictions | 99 |
| 4.3.3. Resolution of OWL2 restrictions | 101 |
| 4.3.4. Relaxing constraints | 102 |
| 4.3.5. Classification of individuals | 104 |
| 4.3.6. Opening and interoperability with the web of data | 106 |
| 4.3.7. Graphical interfaces | 107 |
| 4.4. Application to media analysis | 108 |
| 4.4.1. Model of audiovisual description | 109 |
| 4.4.2. Reference works and description models | 110 |
| 4.4.3. Description pattern | 111 |
| 4.4.4. The management of contexts | 112 |
| 4.4.5. Suggestion of properties | 113 |
| 4.4.6. Suggestion of property values | 114 |
| 4.4.7. Opening on the web of data | 115 |
| 4.5. Application to the management of individuals | 116 |
| 4.5.1. Multi-ontology description | 116 |
| 4.5.2. Faceted browsing | 117 |
| 4.5.3. An individual’s range | 117 |
| 4.6. Application to information searches | 118 |
| 4.6.1. Semantic searches | 118 |
| 4.6.2. Transformation of SPARQL query graphs | 120 |
| 4.6.3. Transformation of OWL2 axioms into SPARQL | 120 |
| 4.6.4. Interface | 121 |
| 4.7. Application to corpus management | 122 |
| 4.8. Application to author publication | 123 |
| 4.8.1. Publication ontologies | 125 |
| 4.8.2. Transformation engine | 128 |
| 4.8.3. Final product | 129 |
| 4.8.4. Opening on the web of data | 129 |
| 4.8.5. Graphical Interface | 130 |
| 4.9. Conclusion | 131 |
| 4.10. Bibliography | 132 |

| | |
|--|-----|
| Chapter 5. Digital Libraries and Crowdsourcing: A Review | 135 |
| Mathieu ANDRO and Imad SALEH | |
| 5.1. The concept of crowdsourcing in libraries. | 136 |
| 5.1.1. Definition of crowdsourcing | 136 |
| 5.1.2. Historic origins of crowdsourcing | 137 |
| 5.1.3. Conceptual origins of crowdsourcing | 140 |
| 5.1.4. Critiques of crowdsourcing. Towards the uberization of libraries? | 140 |
| 5.2. Taxonomy and panorama of crowdsourcing in libraries | 141 |
| 5.2.1. Explicit crowdsourcing | 143 |
| 5.2.2. Gamification and implicit crowdsourcing | 145 |
| 5.2.3. Crowdfunding | 148 |
| 5.3. Analyses of crowdsourcing in libraries from an information and communication perspective. | 150 |
| 5.3.1. Why do libraries have recourse to crowdsourcing and what are the necessary conditions? | 150 |
| 5.3.2. Why do Internet users contribute? Taxonomy of Internet users' motivations | 153 |
| 5.3.3. From symbolic recompense to concrete remuneration | 154 |
| 5.3.4. Communication for recruiting contributors. | 155 |
| 5.3.5. Community management for keeping contributors | 155 |
| 5.3.6. The quality and reintegration of produced data | 156 |
| 5.3.7. The evaluation of crowdsourcing projects | 157 |
| 5.4. Conclusions on collective intelligence and the wisdom of crowds. | 158 |
| 5.5. Bibliography | 159 |
| Chapter 6. Conservation and Promotion of Cultural Heritage in the Context of the Semantic Web | 163 |
| Ashraf AMAD and Nasreddine BOUHAI | |
| 6.1. Introduction. | 163 |
| 6.2. The knowledge resources and models relative to cultural heritage | 164 |
| 6.2.1. Metadata norms | 164 |
| 6.2.2. Controlled vocabularies | 171 |
| 6.2.3. Lexical databases | 172 |
| 6.2.4. Ontologies | 172 |

| | |
|---|------------|
| 6.3. Difficulties and possible solutions | 174 |
| 6.3.1. Data acquisition | 175 |
| 6.3.2. Information modeling | 185 |
| 6.3.3. Use | 195 |
| 6.3.4. Interoperability | 197 |
| 6.4. Conclusion | 201 |
| 6.5. Bibliography | 202 |
| | |
| Chapter 7. On Knowledge Organization and Management for Innovation: Modeling with the Strategic Observation Approach in Material Science | 207 |
| Sahbi SIDHOM and Philippe LAMBERT | |
| 7.1. General introduction | 207 |
| 7.2. Research context: KM and innovation process | 210 |
| 7.2.1. Jean Lamour Institute | 210 |
| 7.2.2. Technology and Knowledge Transfer Office (or CC-VIT) | 211 |
| 7.3. Methodological approach | 212 |
| 7.3.1. Observation and accumulation of knowledge for innovation | 212 |
| 7.3.2. Strategic observation and extraction of knowledge: towards an ontological approach | 215 |
| 7.3.3. Creation of a class hierarchy (of knowledge) | 224 |
| 7.4. Conceptual modeling for innovation: technological transfer. | 225 |
| 7.4.1. Implementations | 226 |
| 7.4.2. Corpus specificities. | 227 |
| 7.4.3. NLP engineering applied to the corpus | 228 |
| 7.4.4. “Polyfunctionalities” favoring strategic observation | 232 |
| 7.5. Conclusion: principal results and recommendations | 233 |
| 7.6. Bibliography | 235 |
| | |
| List of Authors | 239 |
