

## Table of Contents

<b>Preface . . . . .</b>	xiii
<b>PART 1: FOUNDATIONS . . . . .</b>	1
<b>Chapter 1. Contemporary Theories and Concepts in the Psychology of Emotions . . . . .</b>	3
Géraldine COPPIN and David SANDER	
1.1. Introduction . . . . .	3
1.2. Emergence of a scientific approach to emotions . . . . .	4
1.2.1. The emotional sequence: James-Lange versus Cannon-Bard . . . . .	4
1.2.2. Schachter's two-factor theory. . . . .	6
1.3. Basic emotions theories. . . . .	7
1.3.1. Premises of basic emotions theories . . . . .	7
1.3.2. Characteristics of basic emotions . . . . .	8
1.3.3. Criticisms of basic emotions theories . . . . .	10
1.4. Bi-dimensional theories of emotion . . . . .	11
1.4.1. Premises of bi-dimensional theories of emotion . . . . .	11
1.4.2. Criticisms of bi-dimensional theories of emotion . . . . .	12
1.5. Appraisal theories of emotions . . . . .	14
1.5.1. Premises of appraisal theories of emotion . . . . .	14
1.5.2. Specific models of this theoretical trend . . . . .	15
1.5.3. Criticisms of appraisal theories of emotion. . . . .	18
1.6. Conclusion . . . . .	19
1.7. Glossary . . . . .	20
1.8. Bibliography . . . . .	21

<b>Chapter 2. Emotion and the Brain . . . . .</b>	<b>33</b>
Andy CHRISTEN and Didier GRANDJEAN	
2.1. Introduction . . . . .	33
2.1.1. Emotions and the brain: the emergence of affective neuroscience as an independent discipline . . . . .	34
2.2. The major role of affective neuroscience in understanding emotions . . . . .	35
2.2.1. Emotion and the brain: from a unitary entity to processing, from structure to neural networks . . . . .	36
2.2.2. Levels of processing in emotional processes . . . . .	38
2.2.3. Emotion and cognition . . . . .	39
2.3. The historical and conceptual legacy of early conceptions of emotions and the brain . . . . .	40
2.3.1. Forerunners of affective neuroscience . . . . .	40
2.3.1.1. Charles Darwin . . . . .	40
2.3.1.2. The James-Lange peripheralist theory . . . . .	41
2.4. Initial neuro-anatomical emotion theories . . . . .	41
2.4.1. Canon-Bard's centralist theory . . . . .	41
2.4.2. Papez's circuit . . . . .	42
2.4.3. MacLean's limbic theory . . . . .	43
2.5. Structures in the brain and their functions in emotional processes . . . . .	44
2.5.1. Amygdala . . . . .	44
2.5.2. Amygdala and emotional learning processes . . . . .	45
2.5.2.1. Amygdala and classical conditioning . . . . .	45
2.5.2.2. The amygdala: a structure with two processing streams . . . . .	46
2.5.3. The amygdala and emotional perception: hypotheses around the specificity of processing within the amygdala . . . . .	48
2.5.3.1. The amygdala as a fear module . . . . .	48
2.5.3.2. The amygdala and arousal . . . . .	50
2.5.3.3. The amygdala as a relevance detector . . . . .	51
2.5.4. The amygdala and memory processing . . . . .	52
2.6. The prefrontal cortex . . . . .	53
2.6.1. The prefrontal cortex and bodily signals . . . . .	55
2.6.2. The prefrontal cortex and the top-down regulation of behavior . . . . .	56
2.6.3. The prefrontal cortex and the motivational component of emotion . . . . .	57
2.7. The anterior cingulate cortex . . . . .	58
2.8. The role of the insula in disgust . . . . .	58
2.9. Temporal dynamic of brain processes in emotional genesis . . . . .	59
2.10. Functional connectivity . . . . .	60
2.10.1. Investigations of the connectivity using brain imaging techniques (MRI) . . . . .	60

2.10.2. Investigations into connectivity using electroencephalographic (EEG) techniques . . . . .	61
2.10.3. Benefits of brain connectivity studies . . . . .	62
2.11. Conclusion . . . . .	63
2.12. Bibliography . . . . .	64
<b>PART 2: NON-VERBAL BEHAVIOR . . . . .</b>	<b>77</b>
<b>Chapter 3. Emotional Corpora: from Acquisition to Modeling . . . . .</b>	<b>79</b>
Laurence DEVILLERS and Jean-Claude MARTIN	
3.1. Introduction . . . . .	79
3.2. Building corpora: “acted”, “induced” and real-life emotions. . . . .	81
3.2.1. Acted data . . . . .	82
3.2.2. Induced data . . . . .	83
3.2.3. Real-life data . . . . .	84
3.2.4. Comparison of different types of data . . . . .	85
3.3. Current emotional corpora . . . . .	86
3.4. Coding schemes . . . . .	86
3.4.1. Emotional annotation protocols . . . . .	89
3.4.1.1. Definitions of annotated features. . . . .	89
3.4.1.2. Annotation . . . . .	90
3.4.2. Annotating context . . . . .	91
3.4.2.1. Validation . . . . .	92
3.5. Complex emotions in spontaneous data . . . . .	93
3.6. Applications for corpora . . . . .	97
3.6.1. Detecting and deciphering emotions in speech . . . . .	97
3.6.2. Designing an expressive agent from corpora. . . . .	98
3.7. Conclusion . . . . .	100
3.8. Bibliography . . . . .	101
<b>Chapter 4. Visual Emotion Recognition: Status and Key Issues . . . . .</b>	<b>107</b>
Alice CAPLIER	
4.1. Introduction . . . . .	107
4.2. What is a facial expression? . . . . .	109
4.2.1. Definition . . . . .	109
4.2.2. Description. . . . .	109
4.2.3. Ekman’s universal expressions . . . . .	111
4.2.4. An ideal system . . . . .	112
4.3. Overview of facial expression recognition methods . . . . .	112
4.3.1. Databases. . . . .	112
4.3.2. Preprocessing: extracting the face . . . . .	114
4.3.3. Extracting facial characteristics . . . . .	115

4.3.4. Classification . . . . .	117
4.3.5. Performance . . . . .	117
4.4. Spontaneous facial expressions . . . . .	118
4.4.1. Position of the problem . . . . .	118
4.4.2. Databases. . . . .	119
4.4.3. Recognizing spontaneous expressions. . . . .	122
4.5. Expression intensity. . . . .	124
4.6. Dynamic analysis . . . . .	126
4.7. Multimodality . . . . .	128
4.8. Conclusion . . . . .	131
4.9. Bibliography . . . . .	132
<b>Chapter 5. Recognition of Acoustic Emotion . . . . .</b>	<b>139</b>
Chloé CLAVEL and Gaël RICHARD	
5.1. Introduction . . . . .	139
5.2. Principles of automatic emotion-recognition systems . . . . .	140
5.3. Acoustic descriptors. . . . .	141
5.3.1. Voiced versus unvoiced content . . . . .	142
5.3.2. A temporal unit for emotional analysis . . . . .	143
5.3.3. Prosodic descriptors . . . . .	143
5.3.3.1. Fundamental frequency (pitch). . . . .	144
5.3.3.2. Intensity . . . . .	145
5.3.3.3. Rhythm descriptors. . . . .	146
5.3.3.4. Voice quality descriptors . . . . .	146
5.3.4.1. Normalized amplitude quotient . . . . .	147
5.3.4.2. Frequency modulation (jitter). . . . .	147
5.3.4.3. Amplitude modulation (shimmer) . . . . .	148
5.3.4.4. Rate of unvoiced windows . . . . .	148
5.3.4.5. Harmonic to noise ration . . . . .	148
5.3.5. Cepstral and spectral descriptors. . . . .	149
5.3.5.1. Formant parameters . . . . .	149
5.3.5.2. Mel-frequency cepstral coefficients . . . . .	149
5.3.5.3. Bark band energy . . . . .	150
5.3.5.4. Spectral centroide. . . . .	151
5.4. Automatic emotion classification . . . . .	151
5.4.1. Choosing descriptors . . . . .	152
5.4.1.1. Normalizing descriptors . . . . .	152
5.4.1.2. Reduction in data representation space . . . . .	152
5.4.2. Learning algorithms . . . . .	154
5.4.2.1. Separators with vast margin . . . . .	154
5.4.2.2. Gaussian mixture models . . . . .	155
5.5. Performance and assessment. . . . .	157
5.5.1. First factor: data and classes of emotions. . . . .	157

5.5.2. Second factor: the problem of “ground truths” . . . . .	159
5.5.3. Third factor: manual preprocessing . . . . .	160
5.5.4. Fourth factor: learning algorithms . . . . .	160
5.5.5. Fifth factor: learning conditions . . . . .	161
5.6. Conclusion . . . . .	161
5.7. Bibliography . . . . .	163
<b>Chapter 6. Modeling Facial Expressions of Emotions . . . . .</b>	<b>169</b>
Sylwia Julia HYNIEWSKA, Radosław NIEWIADOMSKI and Catherine PELACHAUD	
6.1. Expressive conversational agents . . . . .	169
6.2. Expressions and their emotional states . . . . .	170
6.2.1. Expressing discrete emotions . . . . .	171
6.2.2. Dimensional approaches to emotional expression . . . . .	171
6.2.3. Componential expression of emotions . . . . .	173
6.3. Computational models for facial expressions of emotions . . . . .	174
6.3.1. A discrete representation of facial expressions . . . . .	174
6.3.2. Dimensional representation of facial expressions . . . . .	174
6.3.3. Componential approaches to facial expressions . . . . .	176
6.3.4. Mixtures of emotions and social constraints . . . . .	178
6.3.5. Sequences of emotional expressions . . . . .	181
6.4. Conclusion . . . . .	183
6.5. Acknowledgements . . . . .	184
6.6. Bibliography . . . . .	184
<b>Chapter 7. Emotion Perception and Recognition . . . . .</b>	<b>191</b>
Ioana VASILESCU	
7.1. Introduction . . . . .	191
7.2. Perception in vocal communication of emotion . . . . .	193
7.3. Experimental paradigms and emotion-oriented automatic systems . . . . .	194
7.3.1. Experiments validating emotional content and/or annotation strategies . . . . .	195
7.3.1.1. Experimental design and stimuli . . . . .	195
7.3.1.2. Test populations . . . . .	196
7.3.1.3. Perceptual categorization into emotional classes . . . . .	196
7.3.1.4. Choosing emotional labels . . . . .	197
7.3.1.5. Discussion . . . . .	199
7.3.2. Tests for validating measurable parameters of emotional information . . . . .	202
7.3.2.1. Discussion . . . . .	205
7.3.3. Tests comparing human and automated emotion recognition . . . . .	205
7.3.3.1. Discussion . . . . .	208

x Emotion-oriented Systems

7.4. Conclusion . . . . .	208
7.5. Bibliography . . . . .	209
<b>PART 3: FUNCTIONS . . . . .</b>	<b>215</b>
<b>Chapter 8. The Role of Emotions in Human–Machine Interaction . . . . .</b>	<b>217</b>
Valérie MAFFIOLO and Magalie OCHS	
8.1. Introduction . . . . .	217
8.2. Interactive information and assistance systems . . . . .	219
8.2.1. Uses of emotions in interactive systems . . . . .	220
8.2.2. Current research and tools . . . . .	220
8.2.2.1. Collecting and annotating expressions of emotions . . . . .	221
8.2.2.2. Automatic emotion recognition . . . . .	222
8.2.2.3. Interface expressivity . . . . .	223
8.3. Video games . . . . .	227
8.3.1. The importance of emotions in video games . . . . .	228
8.3.1.1. Emotions in gaming systems . . . . .	228
8.3.1.2. Player emotions . . . . .	229
8.3.2. Current research and tools . . . . .	231
8.3.2.1. Towards believable emotional virtual characters . . . . .	231
8.3.2.2. Towards games that account for player emotions . . . . .	233
8.4. Intelligent tutoring systems (ITS) . . . . .	235
8.4.1. The importance of emotions in ITS . . . . .	235
8.4.1.1. The learner’s emotions . . . . .	235
8.4.1.2. Emotions in ITS . . . . .	235
8.4.2. Current research and tools . . . . .	235
8.5. Discussion and research perspectives . . . . .	237
8.6. Bibliography . . . . .	238
<b>Chapter 9. Music and Emotions . . . . .</b>	<b>247</b>
Donald GLOWINSKI and Antonio CAMURRI	
9.1. The growing importance of music in society . . . . .	247
9.2. Recognizing emotions and structural characteristics in music . . . . .	249
9.2.1. Understanding listeners’ emotional reactions . . . . .	249
9.2.2. A categorical or dimensional approach? . . . . .	250
9.3. Rules for modeling musical expression of emotions . . . . .	251
9.4. Towards a continuous measure of emotional reactions to music . . . . .	252
9.5. Multimodality in musical experience . . . . .	253
9.5.1. A multimodal research platform for musical expression . . . . .	255
9.5.1.1. Level 1 . . . . .	257
9.5.1.2. Level 2 . . . . .	258
9.5.1.3. Level 3 . . . . .	259

9.5.1.4. Level 4 . . . . .	259
9.5.1.5. Overview . . . . .	259
9.6. Multimodal emotional synthesis in a musical context . . . . .	260
9.7. The social active listening paradigm: the collective aspect of emotion . . . . .	262
9.7.1. Example: Mappe per Affetti Erranti . . . . .	262
9.8. Conclusion and perspectives . . . . .	263
9.9. Bibliography . . . . .	263
<b>Chapter 10. Literary Feelings in Interactive Fiction . . . . .</b>	<b>271</b>
Marc CAVAZZA and David PIZZI	
10.1. Introduction: emotions and feelings . . . . .	271
10.2. French novels and the representation of feelings . . . . .	273
10.3. <i>Madame Bovary</i> : plot and scenes . . . . .	275
10.4. Interactive fiction and emotional planning . . . . .	280
10.5. Linguistic interaction and emotions . . . . .	284
10.6. Emma Bovary's virtuality . . . . .	290
10.7. Conclusion . . . . .	294
10.8. Bibliography . . . . .	295
<b>Chapter 11. The Design of Emotions: How the Digital is Making Us More Emotional . . . . .</b>	<b>299</b>
Annie GENTÈS	
11.1. Representing, interpreting and evoking emotions . . . . .	299
11.2. Emotion, <i>mimicry</i> and technical devices . . . . .	301
11.2.1. Representing emotions and catharsis . . . . .	301
11.3. Devices as an alternate source of emotion: photography . . . . .	301
11.4. Art and computers: formal beginnings . . . . .	303
11.5. The human behind the mechanics and the mechanics behind the human . . . . .	305
11.6. Mirror interaction as an emotional vehicle . . . . .	307
11.7. <i>Trompe l'œil</i> versus explicit expression . . . . .	309
11.8. Three-dimensional universes: an empathetic experience . . . . .	311
11.9. Empathy and identifying emotions . . . . .	315
11.9.1. From empathy to shared emotions . . . . .	315
11.10. Making human-machine interaction and dialog effective . . . . .	317
11.11. Conclusion: "revenge of the emotions" . . . . .	318
11.12. Bibliography . . . . .	318
<b>List of Authors . . . . .</b>	<b>321</b>
<b>Index . . . . .</b>	<b>325</b>
