PREFACE	xiii
INTRODUCTION	xvii
CHAPTER 1. THE INNOVATION CONCEPT	1
1.1. The characteristics of an innovation process	1
1.2. Review of basic conceptual definitions in “general systemics”	13
1.2.1. The concept of a process	14
1.2.2. The concept of a processor	14
1.2.3. The concept of functionality	14
1.2.4. The concept of a function	14
1.2.5. The concept of configuration	15
1.2.6. The managerial architecture of a processor	15
1.3. Evaluation criteria for the success of an innovation	17
1.4. Drivers of socioeconomic exchange for an innovation process	18
1.5. Clarifications on certain actions in an innovation process	23
1.5.1. Managing the configuration of an innovation process	23
1.5.2. Creative research	25

1.5.3. Studies on the impact of a new innovation	29
1.5.4. Feasibility studies in the innovation process	32
1.5.5. The decision-making stages of the innovation process	36
1.6. Classification of innovation processes.	37
1.6.1. Three types of company	37
1.6.2. Types of innovations.	39
1.6.3. Correlations between types of innovating companies and types of innovation	39
1.6.4. The specificities of type I innovations.	40
1.6.5. Specificities of type II innovations	44
1.6.6. Specificities of type II and IV innovations.	49
1.7. Conclusion.	52
CHAPTER 2. COMPETITIVE QUALITY OF AN INNOVATION	53
2.1. Introduction.	53
2.2. The concepts which characterize competitive quality	55
2.3. The use of competitive quality in an innovation process	67
2.4. A model of the competitive quality process in an innovation process	69
2.5. Conclusion.	73
CHAPTER 3. COMPETITIVE QUALITY TACTICS	75
3.1. Introduction.	75
3.2. The objective of a competitive quality tactics	76
3.3. Planning competitive quality tactics in the innovation process	81
3.4. Methods for designing competitive quality tactics	88
3.5. The performance of competitive quality tactics	91

3.6. Managing the design of competitive quality tactics	91
3.7. Conclusion.	94
CHAPTER 4. THE MARKETING QUALITY OF AN INNOVATION	97
4.1. Introduction.	97
4.2. Marketing quality in an innovation process	99
4.3. Planning marketing quality within the innovation process.	103
4.3.1. Releases of competitive quality fuel	103
4.3.2. The emergence of stakeholders' competitive quality perceptions	106
4.3.3. Compensatory resources and contributions to the company's image and reputation	107
4.4. Defining marketing quality	108
4.4.1. Marketing quality in releasing competitive quality fuel.	110
4.4.2. Marketing quality in the emergence of competitive quality judgments	111
4.4.3. Marketing quality in the production of compensatory resources	113
4.4.4. Marketing quality in contributing to the company's image and reputation	114
4.5. Marketing quality performance.	115
4.6. Managing the production of marketing quality.	117
4.7. Conclusion.	120
CHAPTER 5. THE "QUALITY" FUEL OF AN INNOVATION	123
5.1. Introduction.	123
5.2. An innovation process' competitive quality fuel.	124
5.3. Planning the design of competitive quality fuel in the innovation process.	127

5.4. Ways of defining competitive quality fuel	129
5.5. Performance of the design of competitive quality fuel	136
5.6. Managing the design of competitive quality fuel	138
5.7. Conclusion.	141
CHAPTER 6. THE EMITTERS OF QUALITY FUEL	143
6.1. Introduction.	143
6.2. Competitive quality fuel emitters	144
6.3. Defining a competitive quality fuel emitter	146
6.4. Planning the design of competitive quality fuel emitters	151
6.5. The performance of the design of competitive quality fuel emitters.	154
6.6. Managing the design of quality fuel emitters	155
6.7. Conclusion.	158
CHAPTER 7. QUALIFICATION OF EMITTERS	159
7.1. Introduction.	159
7.2. The qualification of competitive quality fuel emitters	160
7.3. Method for qualifying competitive quality emitters	161
7.4. The performance of this qualification	164
7.5. Managing the qualification of competitive quality fuel emitters.	165
7.6. Conclusion.	168
CHAPTER 8. VALIDATION OF MARKETING QUALITY	169
8.1. Introduction.	169
8.2. Validation of the competitive quality marketing of an innovation process.	170
8.3. Methods for validating competitive marketing quality in an innovation process.	171

8.4. Planning the validation of competitive marketing quality.	172
8.5. Managing competitive marketing quality validation.	173
8.6. Conclusion.	175
CHAPTER 9. SUPERVISION OF EMITTERS	177
9.1. Introduction.	177
9.2. The objective of supervision	178
9.3. Methods of supervision	179
9.4. Planning the supervision of competitive quality fuel emitters.	180
9.5. The performance of the supervision of CQF emitters.	182
9.6. Managing the supervision of competitive quality fuel emitters	183
9.7. Conclusion.	184
CHAPTER 10. MONITORING PERCEIVED QUALITY	187
10.1. Introduction.	187
10.2. The objective of this monitoring.	188
10.3. Methods of monitoring perceived quality	189
10.4. Planning the monitoring of perceived quality	190
10.5. Managing the monitoring of perceived quality	192
10.6. Conclusion.	194
CHAPTER 11. ENSURING BENEFITS	197
11.1. Introduction.	197
11.2. The objective of ensuring benefits	198
11.3. Methods for ensuring benefits	199
11.4. Planning methods for ensuring benefits	200
11.5. The management of ensuring benefits	202
11.6. Conclusion.	203

CHAPTER 12. THE ROLE OF THE QUALITY DEPARTMENT	205
12.1. Introduction	205
12.2. Positioning a quality department within an innovation process	206
12.3. The specificities of the quality specialist's objectives	211
12.4. The objectives of the quality specialist in creative research	214
12.4.1. The quality specialist's interventions in the emergence of the idea	216
12.4.2. The interventions of the quality specialist in the creation of experimental drafts	218
12.4.3. Interventions of the quality specialist in the creation of drafts of the innovation	221
12.4.4. The interventions of the quality specialist for the creation of drafts of future products or services	226
12.5. The missions of the quality specialist in impact studies on competitive quality fuel	232
12.5.1. The role of the quality specialist in the characterization of future products or services	235
12.5.2. The role of the quality specialist in identifying future clients	237
12.5.3. The role of the quality specialist in the characterization of future uses of the innovation	240
12.5.4. The role of the quality specialist in carrying out prospective studies	243
12.5.5. The role of the quality specialist in carrying out tests on the drafts of future products or services	247
12.6. The missions of the quality specialist in the feasibility studies	253
12.6.1. The role of the quality specialist in conducting the initial feasibility tests of the future products or services	256

12.6.2. The role of the quality specialist in identifying future stakeholders in the project.	258
12.6.3. The role of the quality specialist in the feasibility studies on exchanges with the future stakeholders in the project.	259
12.6.4. The role of the quality specialist in carrying out performance tests of future products or services incorporating the innovation	263
12.6.5. The role of the quality specialist identifying stakeholders in the future BU	265
12.6.6. The role of the quality specialist in studies on the ability of the company to produce future products or services	267
12.7. The role of the quality specialist in equipment design	270
12.7.1. The role of the quality specialist in the construction of the innovation processor	273
12.7.2. The role of the quality specialist in the design of prototypes of the production system for future products or services	275
12.7.3. The role of the quality specialist in the intellectual protection of the innovation	277
12.8. The role of the quality specialist in assisting decision-making.	278
12.9. Conclusion.	285
CHAPTER 13. QUALITY CULTURE IN PROJECT TEAMS.	287
13.1. Introduction.	287
13.2. The inherent visions of quality	288
13.3. The aptitudes for producing quality	290
13.3.1. Individual aptitudes	290
13.3.2. Collective aptitudes	294
13.4. Methods for acquiring aptitudes for producing quality.	297
13.5. Conclusion.	298

APPENDICES	299
APPENDIX 1.	301
APPENDIX 2.	309
APPENDIX 3.	319
